ABOUT ME

MCA graduate specializing in Machine Learning and AI, with hands-on experience building ML models, AI-powered applications, and data-driven solutions. Skilled in Python, SQL, TensorFlow, scikit-learn, and Gemini API, with a strong interest in developing practical AI solutions.

TECHNICAL SKILLS

- **Programming Languages** : Python
- **Libraries & Frameworks** : Flask, Streamlit, Pandas, NumPy, scikit-learn, Tensorflow, Keras
- **Databases** : PostgreSQL, SQLite,
- **Web Technologies** : HTML, CSS
- **Tools & Platforms** : Git, GitHub, Jupyter Notebook, VS Code, PythonAnywhere

EDUCATION

2024 AUG - 2026 JUL — **Master of Computer Application**
Calicut University — CGPA 7.9. CCSIT, Calicut University Campus

2021 AUG - 2024 MAY — **Bachelor of Computer Application**
Calicut University — Grace Valley College

EXPERIENCE

MERN Stack Intern – Futura Labs, Kozhikode, Kerala
Oct 2025 – Dec 2025

- Gained hands-on experience in MongoDB, Express.js, React.js, and Node.js.
- Developed full-stack web applications with REST APIs, CRUD operations, and database integration.
- Gained practical exposure to web application deployment and hosting.

PROJECTS

- **Live Football Match Prediction using Machine Learning -** github link

Developed and deployed a Flask web app using Logistic Regression to predict football match outcomes from historical data and team form. Deployed on PythonAnywhere. Tech: Python, Flask, Pandas, NumPy, scikit-learn, SQLite

- **Intelligent Resume Screening System -** github link

Built a hybrid resume screening system using an ANN model and Gemini API to evaluate resumes, match candidates with job descriptions, and provide skill-gap insights. Achieved $R^2 = 0.949$ on the test dataset. Tech: Python, TensorFlow, Streamlit, Gemini API, SQLite, Pandas, NumPy, scikit-learn

- **Java Code Commenter -** github link

Built an AI-powered Java code commenting tool using Grok API to generate meaningful comments for Java source code. Tech: Python, Streamlit.

- **Machine Learning, Neural Network, FastAPI Mini Projects -** github link → ML / NN / FastAPI

Built multiple ML projects using Python and scikit-learn. Also experimented with TensorFlow neural-network projects and built FastAPI prediction endpoints for trained ML models.

CERTIFICATES

- **Supervised Machine Learning: Regression and Classification** - certificate link
  - DeepLearning.AI, Stanford University, Coursera
- **Advanced Learning Algorithm** - certificate link
  - DeepLearning.AI, Stanford University, Coursera

ACHIEVEMENTS & TECHNICAL ACTIVITIES

- Organized a football prediction event for 70+ participants, developing and managing a live prediction platform and coordinating participant engagement. **websit link**
- Co-organized Prompt Royal (Prompt Engineering) and Build It Right (Vibe Coding) during a campus technical event.
